Having worked at Off Trax for four years as an in house assistant, I have gained an extensive knowledge of different camera formats and a confident ability working with various methods of grip technology. I am particularly specialised with camera cranes and stabilised gimbals in which I have tutored dedicated courses approved by the GBCT.

Embracing each shoot with a positive view and enthusiasm, I continue to seek new challenges. I am skilled working in a diverse range of environments, whether that is within a live studio or outside on location across a diverse range of productions.
