Highly qualified Seasoned Sound Recordist (London based)

Expert in utilising technical and creative aspects of sound recording for film and television. Knowledgeable in LAV mounting, radio microphone operation, multichannel sound recording, talk back system operation and time code. Adept in effectively developing and maintaining solid broadcast technical specifications and deliverables. In depth knowledge of audio design and engineering, sound equipment maintenance and repair, coupled with excellent IT skills and computer hardware familiarity. Strive to bring the best of abilities in every task undertaken while maintaining calm, positive demeanour at all times. Dedicated in improving craft along with current knowledge and skills towards personal development and career progression and growth.

I have a genuine passion for sound recording with over 15 years audio experience within the music industry eventually leading to field recording for TV. I work well within highly pressured and fast-paced environments.

Please visit my website for greater details and examples of my work including downloads of surround & stereo sound recordings of various wild tracks.
