The Magic Mile.

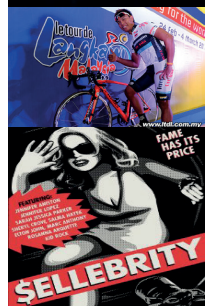

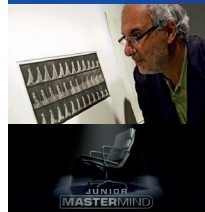

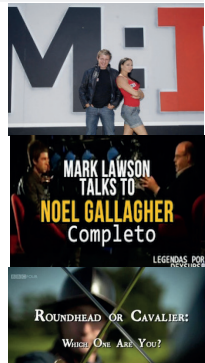

"This was always going to be one of those films that relied heavily on the sound to convey and carry the story. Because of that, I talked as much to the sound man during filming as I did to the DP. I think a lot of people neglect the sound when they are making a film and it is a big mistake.

This way, the sound designer had the material to make it work rather than having to spend months creating artificial effects and samples in the studio. The sound has an authentic, natural feel."
