I have been recording sound since the nineties and still get excited when I visit new locations and meet new people. It has to be one of the best jobs in the world and I will deliver the very best audio to match your high expectations. We will work together to make your programme something that we can all be proud of. For those who go on to an audio post session the Cedar DNS-2 will tell me how much it can be improved, and for those who have a tighter turn round I can apply audio processing on location to help us in more difficult locations with noisy air con or traffic. I can sync six cameras, send full bandwidth wireless audio to two and give separate audio to you on an SD card.

News Latest purchase is a [Cedar DNS-2](#)
