Having started as a camera trainee and assistant I have since spent 8+ years in the industry working with many DOP's and productions gaining a lot of experience along the way. With credits that range from Live OB right through to Factual Entertainment and Commercial.

As well as regular camera operating and Assisting, I am well versed with specialist and custom camera rigs with in-car work done on shows such as TopGear and drone work done across a range of TV shows including Discovery Channels Gold Rush.
