## BIOGRAPHY

I have been working in the industry since 2001 where I started as a Camera trainee on the second series of Holby City. From there I built up knowledge and skills through a vast array of projects and genres, working in comedy, drama, documentary, studio, live, entertainment, commercial and branded content.

My work has taken me around the world on many different projects with an array of challenges. Involving many styles of camera techniques and lighting which are always to the subject matter. I enjoy working with a calm and open minded approach both on and off set.

Creating new and exciting projects that have their own voice is what I enjoy. It doesn't matter the genre, the challenge and creation is the key!
