Now in my 15th year in professional sound, having travelled around the world as a location Sound Recordist, Studio Sound Mixer and Sound Supervisor, It's been important to adapt to the times – both technically, ensuring I have the latest extensive equipment to offer clients, and productively, offering solutions to newer, ever-growing demands such as live streaming & online content, fixed rig, multi zone RF to name a few scenarios. Having worked on a plethora of productions (obs.doc, studio, commercial, BTS/EPK, multi camera, fixed rig, outside broadcast) including BAFTA nominated productions, I can provide solutions to almost any production requirements, including bringing my crew onto larger shoots.
