Production - Alex Macadam

I am a versatile and collaborative camera operator; I enjoy working closely with directors and DOPs to understand the needs of the story and helping to realise their creative vision.

Specialising in multi-camera setups, complex lighting, stylised interviews and stylised handheld actuality including gimbal work. I’m comfortable and experienced working with high level talent.

International shoots with complex requirements for equipment and crew, including implementing carnets and liaising with customs. In depth preparation, tailoring equipment to fit the needs of a project; balancing style with practicality, for both small and larger scale productions. As a camera assistant and Focus Puller I learnt from some of the most talented Operators and DOPs in the business. I have developed my Camera Operating skills over 10 years of working across multiple genres in the industry. Every project requires it’s own specific approach, but by using the tools at our disposal and being willing to solve problems on the fly it is possible to create images that capture the attention and stimulate the imagination.

EQUIPMENT

Sony FX9 & FX6 cameras, Sigma Cine Primes & Canon zooms lenses. Comprehensive lighting, sound and grips packages.
