*I'm a UK based Sound Mixer and PSC recordist and have been working professionally since 2007, although I shot my first film in the 90s. I work in studios and on location on films and television, plus documentaries, commercials, short films and corporates.*

*I own a full studio feature film equipment rig, as well as portable equipment ops for PSC. I have worked with 35mm, 16mm, and all the latest broadcast cameras, as well as multi camera shoots and occasionally hand held mobile. My day to day work includes dailies for UK television as well as corporate and commercial work.*
